

ABSTRACT OF THE DISCLOSURE

5 A developer supply container detachably
mountable to an image forming apparatus includes a
container body for containing developer; a discharge
opening, disposed at a peripheral surface of the
container body, for permitting discharge of the
developer therefrom; feeding means for feeding the
developer toward the discharge opening by rotation of
the container body; and detection means for detecting
10 an amount of the developer remaining in the container
body. The detection means has a detection area which
at least partially overlaps the discharge opening as
seen in a direction perpendicular to a longitudinal
direction of the developer supply container.
